# DMET Enablement Team

MoJ Analytical Platform

What is the Enablement Team?

Formed within the Data Modelling and Engineering team to help domain teams evaluate, build, adopt and promote strategic solutions.

- 🆘 We are need-driven: The work we do will answer specific problems our domain teams and their partners face.

- ⏳ We have a rotational membership: The enablement team will collaborate with the relevant domain team(s) for the duration of the project.

- 👥 We cross team boundaries: Where problems impact or require a cross-cutting solution we will consult across domains and professions.

Modes of Interaction

Probation

Iceberg Evaluation

create-a-curated-table

Prisons

Civil

Snapshot Curation

Criminal

Athena monitoring

Data Platform Apps and Tools

Domain Team

Liaises with data providers and consumers
Covers both curation and derivation
Owns outcome of enablement project

Centre for Excellence

Helps domain teams to evaluate, build,
adopt and promote statregic solutions

Platform Team

Enables domain teams to deliver work with
substantial autonomy by providing internal
services to reduce their cognitive load
